

edu.duke.ImageResource.set
Pixel

```
graph LR; A[edu.duke.ImageResource.setPixel] --> B[edu.duke.ImageResource.getHeight]; A --> C[edu.duke.ImageResource.getWidth];
```

The diagram illustrates a dependency between methods in the edu.duke.ImageResource class. A central box on the left, labeled 'edu.duke.ImageResource.setPixel', has two blue arrows pointing to two boxes on the right. The top box on the right is labeled 'edu.duke.ImageResource.getHeight' and the bottom box is labeled 'edu.duke.ImageResource.getWidth'. This indicates that the setPixel method depends on the state or values returned by the getHeight and getWidth methods.
